

Training Path FNT Data Center Infrastructure Management

Training Path: FNT Data Center Infrastructure Management

FNT Command Basic

The handling of the CI library (component library, e.g. distribution cabinets, assembly units, device and cable types, and the management of the real estate constitute the focal area of this course. The course participant learns practice-oriented the form of the physical infrastructure, the cabling of the CIs (components), and the schematic representation of the cable connections. The realistic representation of the components supports the participant and so greatly simplifies the equipping of the switch cabinets. Because all elements in the database can be called as ACTUAL or PLAN instance, individual training exercises further support these procedures. The wide range of report possibilities provide information for an efficient management of the IT components.

Content overview:

- Real estate – structure of a zone structure over the levels Campus, Building, Floor and Room, as well as the Topzones
- CI Library – structure and use of the component library
- Configuring the individual CIs, adding file attachments, forming logical groupings, links to accessories
- Management of switch cabinets with objects from the CI Library
- Assembly unit management
- Object management – search conditions, linked queries, data export
- Cabling
- Creation of logical connections for devices and directors via the Connection Matrix
- Output of assignment lists and signal tracing, graphical representation via the Net Spider program section
- Inventory management with warehouse management and inventORIZATION
- Creation of work instructions (mounting orders, patch and relocation lists) via the Planning program section

Course duration:

- 3 days

FNT Command DCIM

Prerequisite: FNT Command Basic

Are you faced with the challenge that your data center has a heterogeneous system landscape, some of which may be proprietary?

Do you want to use the existing resources, such as servers, storage, air-conditioning systems, power, floor areas more efficiently and so market more economically?

Are you confronted with the fact that the deployed components are supported by different departments and cost centers, but you want a complete overview, for example, of the various maintenance contracts and their interfaces pertaining in your division?

If these questions are of concern and you use Command for the documentation and planning of your IT infrastructure, this course is ideal to provide the necessary knowledge for the practical implementation in the data center area.

This course focuses on the general procedure for the documentation of a data center. Questions like "What are the pain points for a data center operator and their consequences?" and "Which solutions does the FNT Data Center Infrastructure Management (DCIM) offer for these problem situations?" are considered.

This course shows how with a currently deployed FNT Command c-base / c-line documentation, an existing data center can be integrated appropriately in the documentation with the DCIM solution. A data center, the footprints and the power documentation are created successively together with the participants, and during the course augmented with the topic climate zones. Furthermore, the procedure for connecting a completely new data center on so-called "green fields" is considered. The complete topic is complemented by the consideration of the various report possibilities within the DCIM environment.

Content overview:

- Procedure for the data center documentation based on an integrated practical example
- Creation and management of footprints for the graphical representation of rooms in data centers
- Displays of threshold violations in the areas of power, climate control and weight
- Management of weight details for CIs, cabinets and rooms
- Familiarization with all important areas of the power and climate-control documentation (the complete power chain from the end consumer to the generator)
- Creation and populating of new power distributors
- Wiring of fuses with the target devices and end consumers with regard to overload safety
- Use and evaluation of various analysis diagrams (e.g. climate-control, power and surface utilization)
- Display of the created footprints with 3D Footprint

Course duration:

2 days

FNT Monitoring

Prerequisite: FNT Command Basic

In the FNT Monitoring course, practice-related examples explain how you can configure your monitored devices in the Monitoring Management. This includes, for example, the monitoring of air humidity or temperature. The monitoring of power data or the issuance of Ping commands can be configured.

After transferring the configuration, you can use the FNT Monitoring graphical user interface for monitoring and so be informed immediately in the event of a fault or a threshold violation.

The provided reports and trend analyses complete the course.

Content overview:

- Configuration of services for monitoring devices
- Overview and structure of the available service specifications (plug-ins)
- Management of monitoring instances
- Assignment of services to target devices (Command CI)
- Monitoring and analysis with the FNT Monitoring graphical user interface
- Configuration of the notifications for faults or threshold violations
- Creation of service groups for grouping several services (average/total)
- Creation of configuration templates
- Definition of different time windows for monitoring devices
- Fetching OIDs from the MIB files using the integrated tool

Course duration:

- 1 day

General Terms and Conditions for Trainings Conducted by FNT GmbH

1. Scope of Application of the GTC / Severability Clause / Electronic Commerce

1.1. The following terms and conditions ("GTC") shall apply to all - including future - contracts regarding the participation in trainings conducted online, on-site at the customer's premises, or in-house at FNT (hereinafter referred to as "training/s") initiated and / or concluded between FNT and a company within the meaning of § 14 BGB (German Civil Code) (hereinafter "customer").

The general terms and conditions of the customer are objected to. FNT conducts trainings subject to the validity of the present GTC only.

1.2. Should a provision of the present GTC be or become ineffective or unenforceable, then this shall not affect the validity of the remaining GTC.

§ 312i (1) paragraph 1, 2 and 3 BGB, which impose additional obligations upon FNT regarding contracts in electronic commerce, shall be excluded.

2. Registration and Acknowledgement of Registration

Registrations must be made in text form. The customer shall be bound to this registration for 21 days. FNT shall acknowledge the customer's participation in the training as soon as possible or refuse it if there are no vacancies.

3. Cancellations

3.1. If a training event is conducted exclusively for one customer (on-site at the customer's premises or in-house at FNT), and

- if the training date agreed upon is canceled by the customer up to 28 days before the beginning of the training, then the customer shall pay, against the provision of receipts, only the cost already incurred that cannot be cancelled, for example, for room rental or travel expenses, provided that the customer and FNT agree on a new training date within the next 6 months after the canceled date. If this does not happen,

then FNT shall have the right to withdraw from the training contract and claim as damage a lump sum of 20% of the training fees, including ancillary costs;

- if the training date agreed upon is canceled by the customer up to 27 days or less before the beginning of the training, then the customer shall pay, against the provision of receipts, only the cost already incurred that cannot be cancelled, for example, for room rental or travel expenses, provided that the customer and FNT agree on a new training date within the next 6 months after the canceled date. If this does not happen, then FNT shall have the right to withdraw from the training contract and claim as damage a lump sum of 90% of the training fees, including ancillary costs;

If a training event is conducted for several customers (on-site at the customer's premises or in-house at FNT), then the customer can

- withdraw from the training contract free of charge up to 28 days before the beginning of the training;
- withdraw from the training contract 27 or 14 days before the beginning of the training. However, the customer shall then be obliged to pay 50% of the training fee as lump sum damage compensation to FNT;
- withdraw from the training contract 13 days or less before the beginning of the training. However, the customer shall then be obliged to pay 100% of the training fee as lump sum damage compensation to FNT;

3.2. FNT shall be entitled to cancel a training event in text form until at most 10 calendar days before commencement. FNT shall offer the customer an alternative event. The customer shall not be entitled to any further claims.

4. Prices / Terms of Payment

4.1. The prices of the respective price list valid at the registration date for online, on-site or in-house training shall apply.

Prices for in-house training events at FNT shall include the use of the technical facilities and systems, as well as soft drinks and lunch. Travel, accommodation and other subsistence costs of the participants shall be borne by the customer.

In the case of on-site training events at the customer's premises, the customer shall provide the room facilities and meals for the participants and the trainer at the customer's expense. FNT shall be reimbursed by the customer for the travel expenses incurred for the trainer at cost.

4.2. After commencement of the training, FNT shall issue an invoice which is due immediately without deduction.

5. Training Location

If no on-line or on-site training at the customer's premises has been arranged, then the training event shall take place in the rooms of FNT.

6. Liability

6.1 Liability by FNT for damage caused by simple negligence shall be excluded, unless damage to life, limb or health or the breach of essential contractual obligations is at issue.

6.2 In the event of simple negligence, FNT shall be liable for breach of essential contractual obligations limited to the damage foreseeable at the time of conclusion of the contract, up to a maximum of € 1,000,000.

6.3 Liability under the Product Liability Act shall remain unaffected.

6.4 In all other cases, FNT's liability shall be unlimited unless a maximum liability is stipulated by law.

7. Data Protection

Upon the conclusion of a training contract, FNT shall process the following personal data:

name, address, e-mail address and telephone number of the customer,

name, e-mail address and telephone number of the authorized representing bodies of the customer and the employees sent by the customer for training.

FNT shall process this data to the extent necessary for the implementation of the training contract, including obtaining bank and credit report information for a credit check of the customer, issuing an invoice

and carrying out dunning and collection measures. The data shall be deleted automatically when the tax retention periods applicable to that data have expired.

8. Set-Off, Right of Retention

The customer shall only be entitled to offset or assert a right of retention where a claim is undisputed or has been legally established.

9. Applicable Law, Jurisdiction

The legal relationships between the customer and FNT shall be subject to German Law while excluding the United Nations Convention on Contracts for the International Sale of Goods (CISG).

The exclusive place of jurisdiction for any disputes between the parties arising from or on the occasion of a training event shall be Ellwangen (Jagst), unless a different place of jurisdiction is necessarily prescribed by law.
