

# FACT SHEET

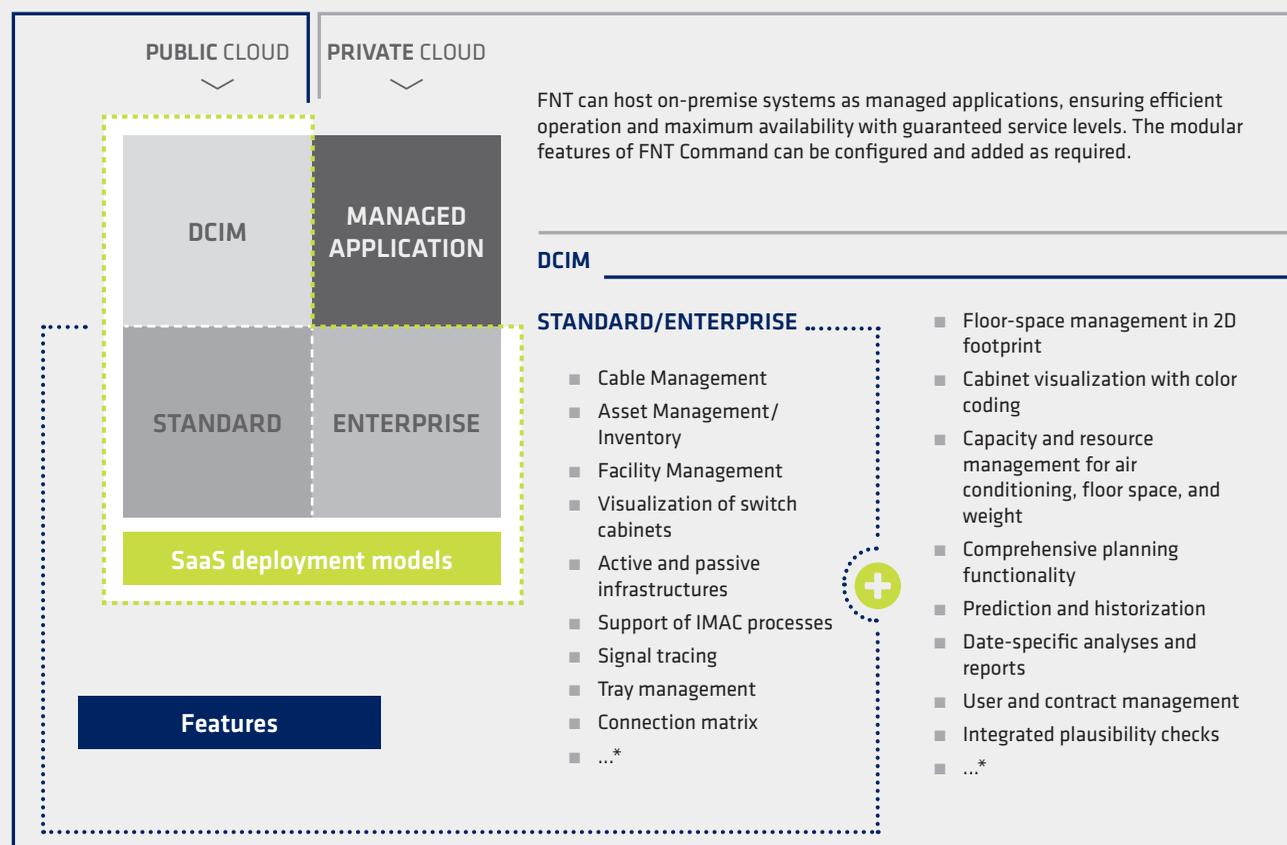

## // FNT Command-as-a-Service

The FNT SaaS solution is based entirely on FNT Command-as-a-Service, a modular, user-friendly, and web-based solution that supports multiple mandators, languages, and users.

The scalable system can be deployed incrementally and resource-efficiently, making it easier for you to establish it as a fully-featured and expandable solution for your business.

There is a choice of deployment models, giving you the specific functionality you need at minimum cost.

Learn more: [www.fntsoftware.com/en/command-aas](http://www.fntsoftware.com/en/command-aas)

FNT can host on-premise systems as managed applications, ensuring efficient operation and maximum availability with guaranteed service levels. The modular features of FNT Command can be configured and added as required.

\* Additional feature modules can be added as required.

## Overview of deployment models and available options

|   | FNT Command SaaS           |                                  | FNT Command ON PREMISE            |
|---|----------------------------|----------------------------------|-----------------------------------|
|   | DCIM STANDARD PUBLIC CLOUD | ENTERPRISE VIRTUAL PRIVATE CLOUD | MANAGED APPLICATION PRIVATE CLOUD |
| <b>Licensing model</b>                                  |                            |                                  |                                   |
