 - Total
 - Used
 - Free
- **Number of software product licenses by status:**
 - Valid
 - Expires soon
 - Expired

Business Value

License Compliance: Ensure all software usage aligns with licensing agreements, helping avoid legal and financial penalties for non-compliance.

Informed Decision-Making: Plan for software upgrades, renewals, or replacements based on actual usage and coverage needs.

Cost Optimization: Identify unused or underutilized licenses, enabling the organization to reallocate or cancel them, reducing unnecessary expenses.

Enhanced IT Asset Management: Provide a clear overview of all software products and versions, supporting efficient management of the IT landscape.

Security and Risk Mitigation: Track software versions to identify outdated or unsupported applications, reducing vulnerabilities and ensuring the use of secure, up-to-date systems.
