# Workplace Landscape Composition Report

Why use this report?

You want to understand how different physical and digital spaces within your organization are structured, managed, and utilized. This knowledge about the various types of workspaces, their configurations, and the technology and infrastructure supporting them is key to achieving operational efficiency and aligning workplace resources with business objectives.

KPIs in this report

- **Number of:**
  - Workplaces by location
  - Workplaces by type
  - Workplaces by status (operating, planning)
  - Workplace components by location
  - Workplace components by function and manufacturer

Business Value

Enhanced Operational Insight: With data on the number and types of workspaces across locations, companies gain a high-level overview that aids strategic planning. Knowing how many and what types of workspaces are in use enables better resource allocation and highlights opportunities for improvement or consolidation.

Detailed Asset Understanding: By breaking down workspace components and detailing their types and manufacturers, the report provides a granular understanding of infrastructure. This insight supports informed decision-making, helping businesses identify areas where specific upgrades, replacements, or consolidations could reduce costs or enhance functionality.

Compliance and Risk Management: Tracking device types, locations, and manufacturers ensures that all assets meet regulatory and safety standards, reducing risk exposure. Maintaining accurate data on equipment locations and manufacturers also aids in managing warranties and anticipating maintenance needs, helping avoid potential fines and ensure regulatory compliance.
